

ENGINEUITY 2020

COMPETITION REVIEW

The Global Challenge

The **ENGINUITY 2020** Competition gave participants the opportunity to experience the challenges that face their corporate management on a daily basis, and pitted them against their colleagues and peers from around the world in a unique business management challenge.

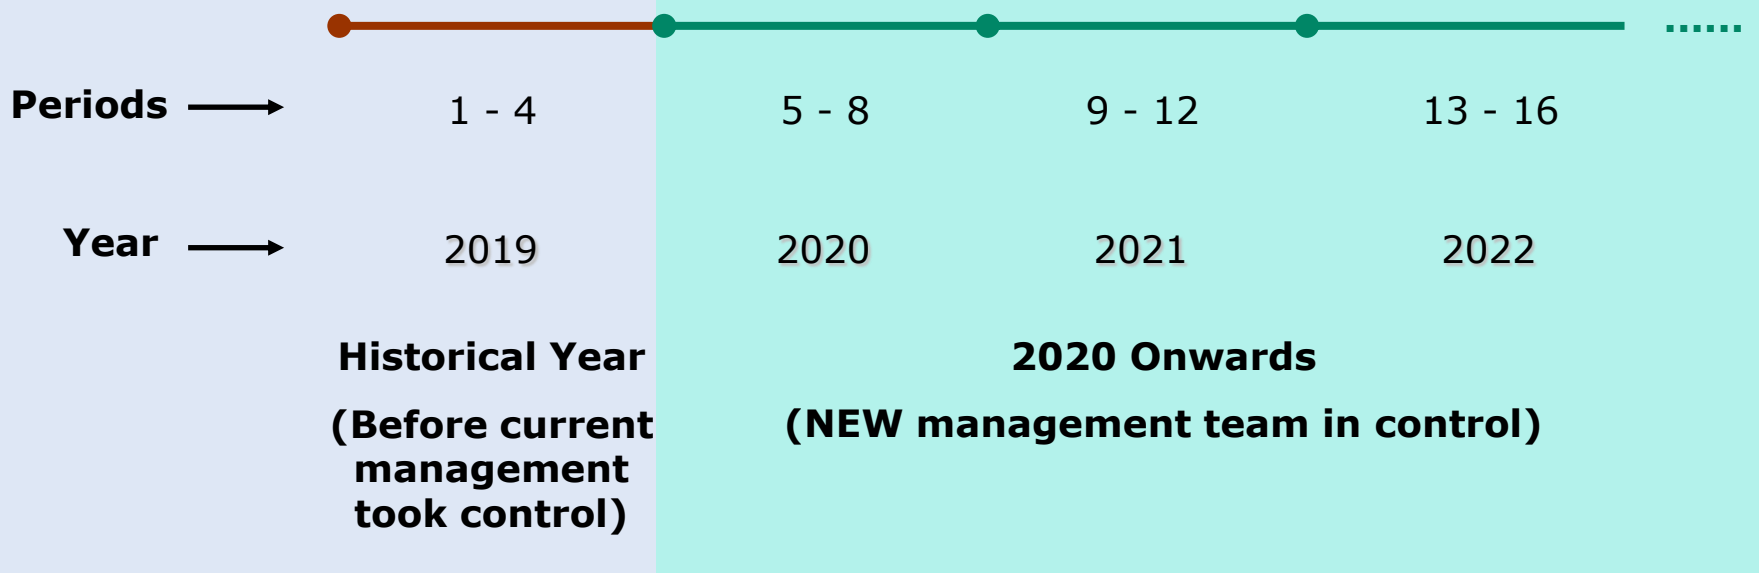

Using a sophisticated computer simulation, competing teams were given the task of managing a fledgling UK-based global construction business from 2020 onwards.

STRATEGY AND DECISION MAKING

To be successful, each management team needed to devise an effective business strategy to grow their business, making decisions in a number of key areas, including finance, marketing, overheads, procurement and job progression.

Decisions were made for a period, representing 3 months, or a quarter, in the real world.

Preliminary Rounds

THE PRELIMINARY ROUNDS

During the 8 weekly Preliminary Rounds, which took place between March and May, each team played independently in their own 'virtual' world, competing for work against simulated rival companies, each with their own bidding strategies.

12 teams qualified for the Final, spread globally, with 1 team from the UK, 4 from the United States, 1 from Canada, 2 from India, 1 from Qatar, 1 from South Africa, 1 from Australia, and 1 from New Zealand, and there was just 139 points separating the teams going into the 6-round Final.

Defending champions Parsons were well represented with three teams, along with previous winners WSP, with teams from Hatch, Jacobs and Stantec all hoping to become first-time winners.

The Final

THE FINAL

The final was played over a further 6 rounds during two weeks in late May and early June, enabling the teams to take part in the final from wherever they were located, and giving them enough time between each round to make considered and effective decisions, and reflect upon and refine their strategies.

During the final the teams competed 'head to head' directly against each other. This created an even more uncertain and pressurised environment in which the skills and team dynamics formed in the early years were really put to the test.

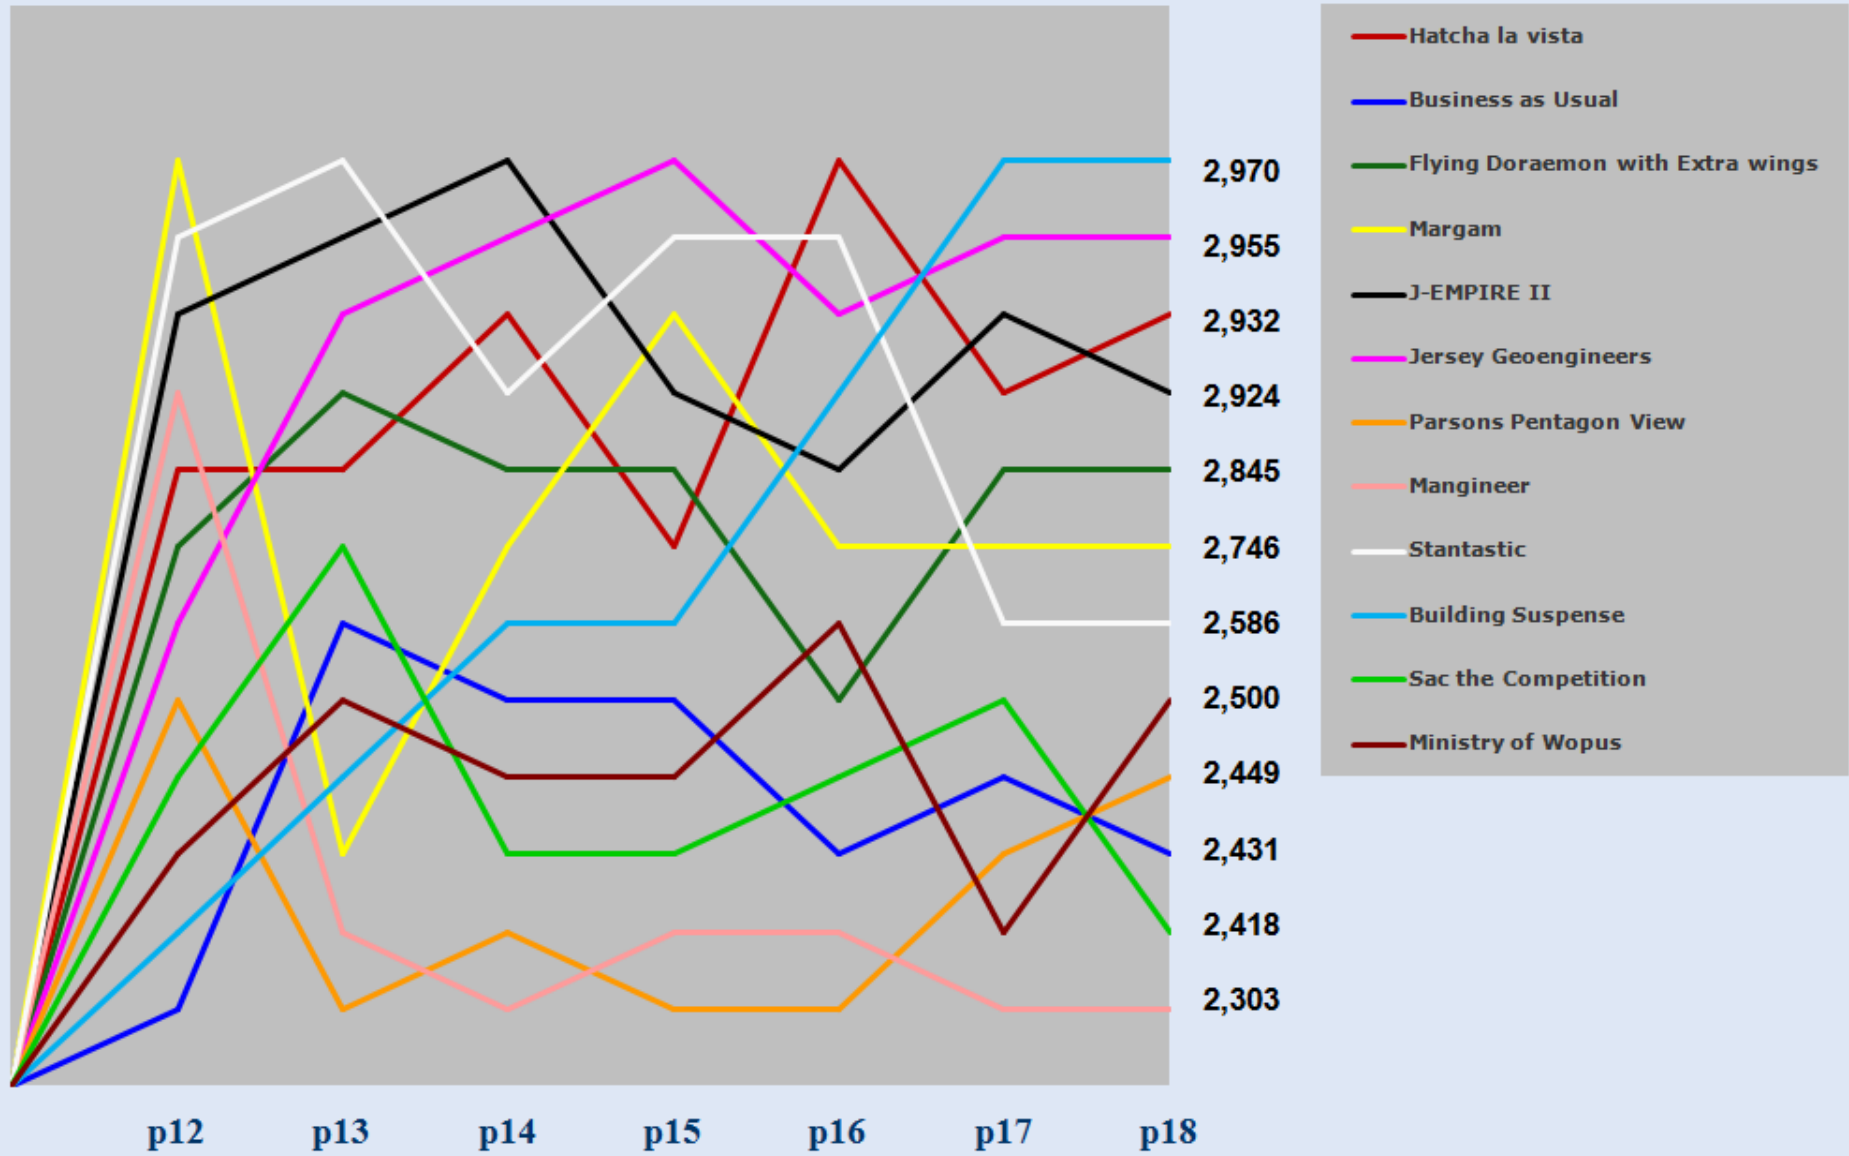

The final saw lots of ups and downs, but ultimately it was **“Building Suspense”** from **WSP (United States)** who emerged victorious as the **ENGINEUNITY 2020 Champions**.
