

# ENGINUITY SOFTWARE LICENCE

## SOFTWARE USAGE

---

The **ENGINUITY** software can be installed on as many client machines as is required.

## TECHNICAL REQUIREMENTS

---

- A client computer running the **Microsoft Windows** operating system
- An **e-mail address** for sending and receiving information
- **Internet access** to view web-based information about the competition

## SOFTWARE INSTALLATION

---

The software can be downloaded from the "**Participants' Area**" of the website.

To install the software follow the steps in the "Guide to getting started".

## COMPETITION SPECIFIC

---

All communication takes place between the participant and the Competition Controller.

Interaction involves the sending and receiving of a company database via e-mail.

The company database has a ".dat" extension.
